3. Water Conservation

1. Rain Water Harvesting:

Rain water harvesting is a technique for collecting the rainwater in tanks and underground tanks. Our institute has tanks for collecting rain water and these water are used for various purposes likes distilled water in chemistry departments for preparing the solutions and practical's. Also waste water used for gardens in botany departments and in college campus.

2. Bore well/Open well recharge :

Bore well recharge is one of the most important technique to increase the ground level water. Our institute has Bore well recharge near right side of entrance gate. Bore well recharging mainly focuses on utilizing surface or rooftop water that has been harvested and places where run-off water starts to percolate through pipes.

3. Maintenance of water in campus:

Rain water collected from rain are regularly used and maintained properly. departments of Chemistry and Botany are used rain water for preparing solutions and practical's in laboratory. Waste water used in gardens in botany departments and in college campus
